

"Green Chemistry Connections"

Fostering the growth of the green chemistry education community in a virtual world

BB

The Beyond Benign team is awesome. The connections [at the virtual meetings] have been so helpful and I am learning so much!

-Faculty Member

Beyond Benign is a 501(c)3 non-profit dedicated to advancing green chemistry education. Through green chemistry education, we can catalyze green technological innovations that result in less hazardous materials, products and processes in support of a sustainable, healthy society.

To empower educators to make systemic change, Beyond Benign hosts a series of virtual meetings and webinars to equip K-12 and Higher Ed educators the virtual peer support network and educational resources necessary to transform chemistry education for a more sustainable world.

Green Chemistry Connections Programming Includes:

- Monthly virtual events Sept'22 - June '23 over 200 educators globally
- Green chemistry topics chosen in partnership with educators
- Educator and industry led webinars/panels
- Creation of virtual resources for educators and student activities
- Curation and sharing of virtual resources

JOIN US

Your sponsorship of Green Chemistry Connections delivers year-long impact to :

- Drive awareness for green chemistry education to over 200 educators
- Increase the number of educators capable of teaching green chemistry in their classroom
- Develop resources that can be used for virtual teaching
- Foster collaborations and new connections between community members
- Support the sharing of virtual resources and experiences of teaching green chemistry in virtual platforms
- Provide a sense of belongingness by community members
- Build the foundation of a resource repository that can be used by the broader community
